

# This is part two of the tatting instructions.

These are **left handed** tatting instructions.

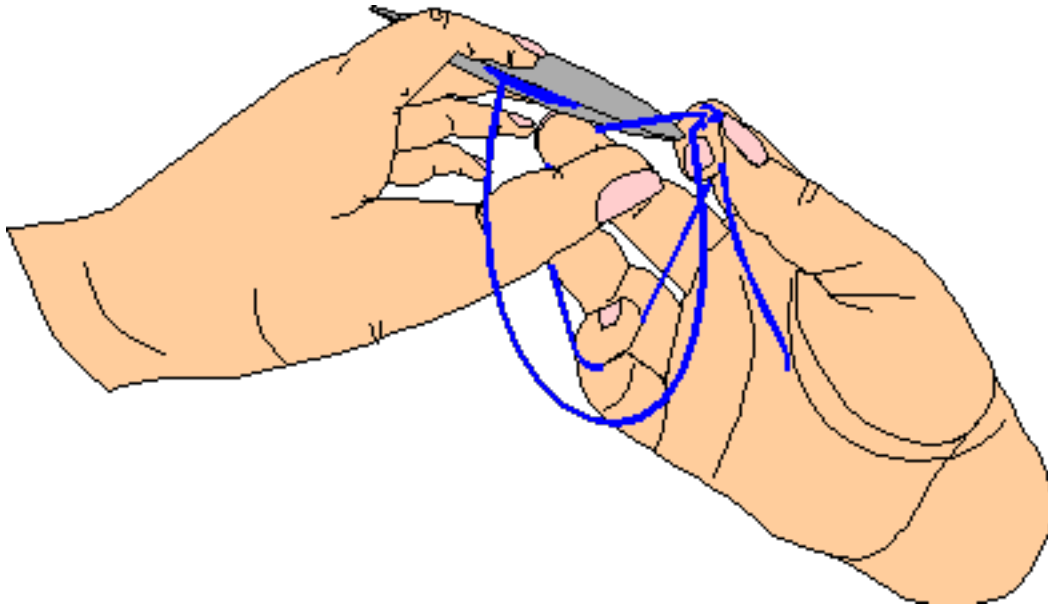

The second half is similar, but you pass the shuttle *over* the thread between your right index and middle fingers.

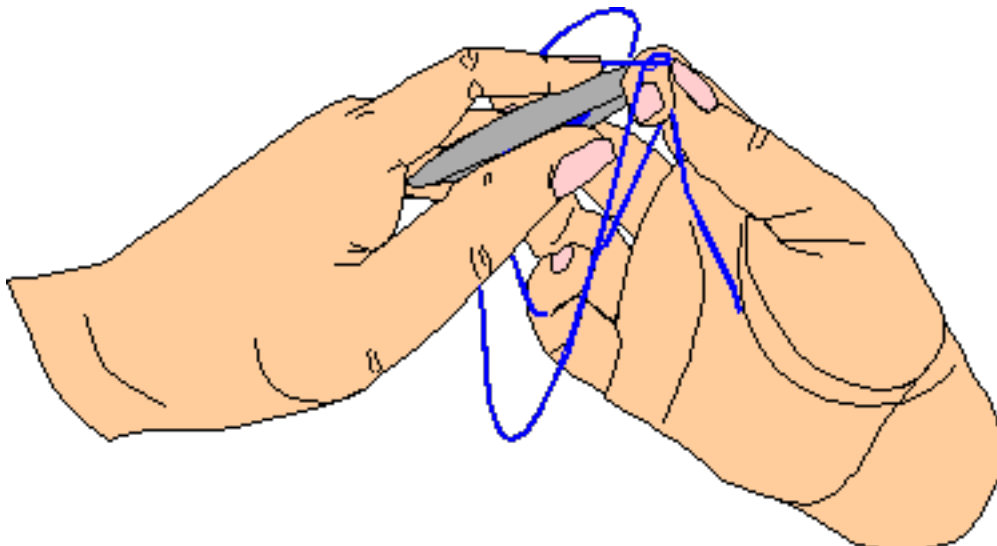

Do not drape the thread over the back of your left hand this time.

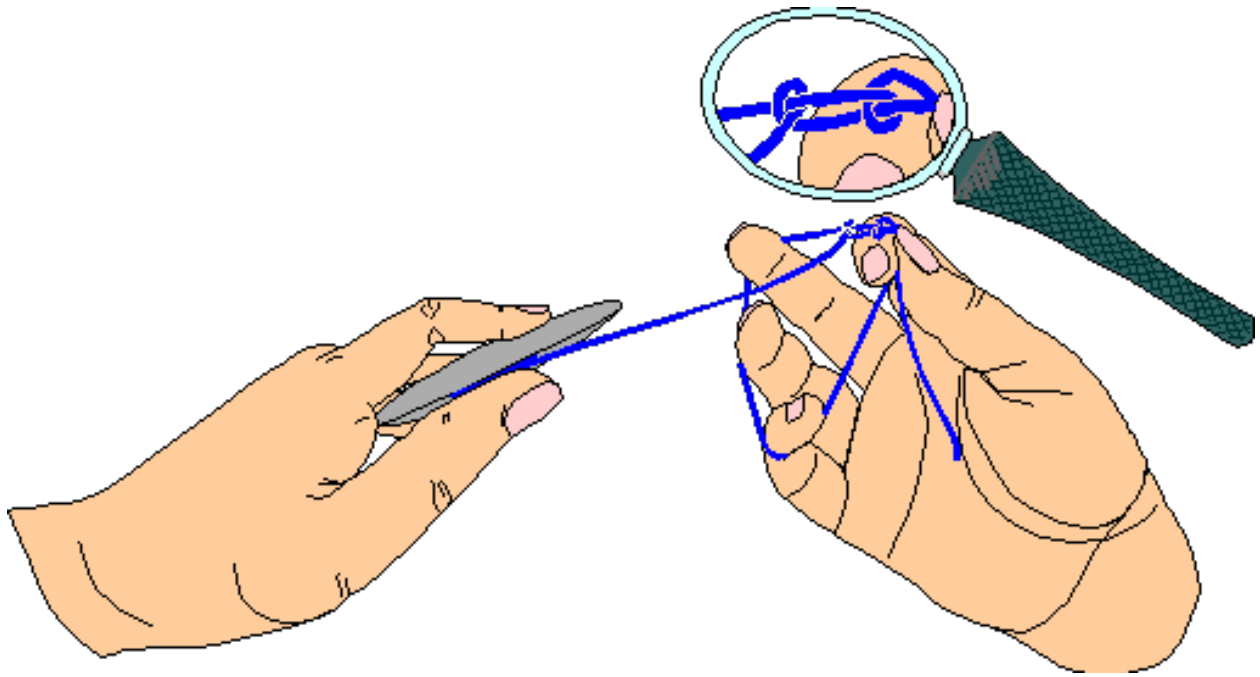

Pass the shuttle over and then under the thread between your right index and middle fingers.

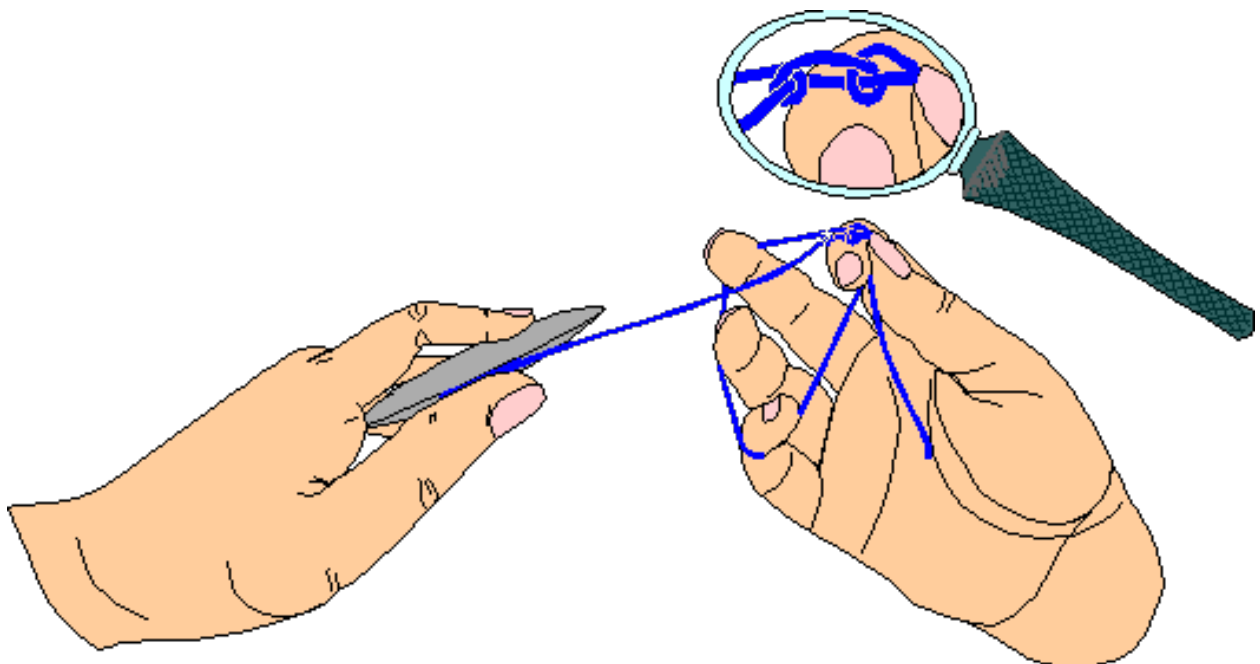

Pull the shuttle back through the loop that naturally falls in front of your right hand.

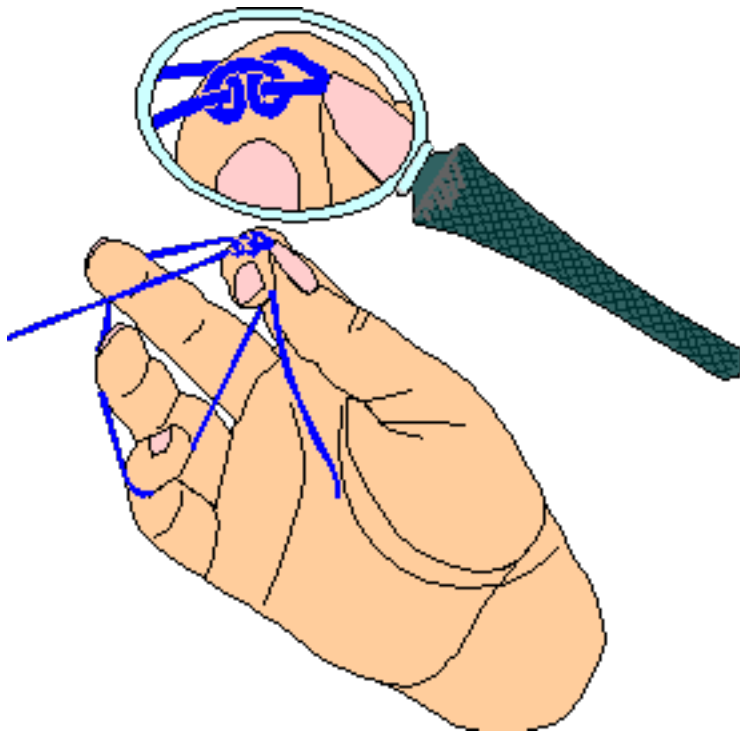

Pull the shuttle thread taut slowly while loosening the tension on your right middle finger to get the knot to transfer.

Like this:

You have now completed a basic tatting stitch

Using CorelDraw!(tm) and Corel Photo-Paint(tm) I drew the pictures from scans of my own hands and wrote the text myself. I hold all rights to this page except the arrows and magnifying glass which are CorelDraw!(tm) clipart.
