

This is part two of the tatting instructions.

These instructions are for **right handed** tatting.

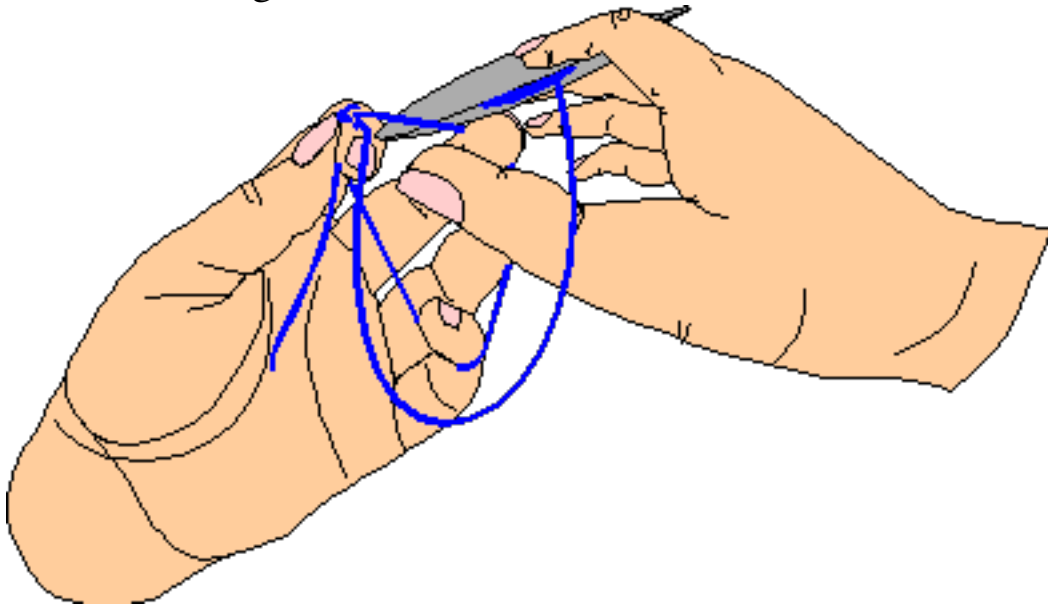

The second half is similar, but you pass the shuttle *over* the thread between your left index and middle fingers.

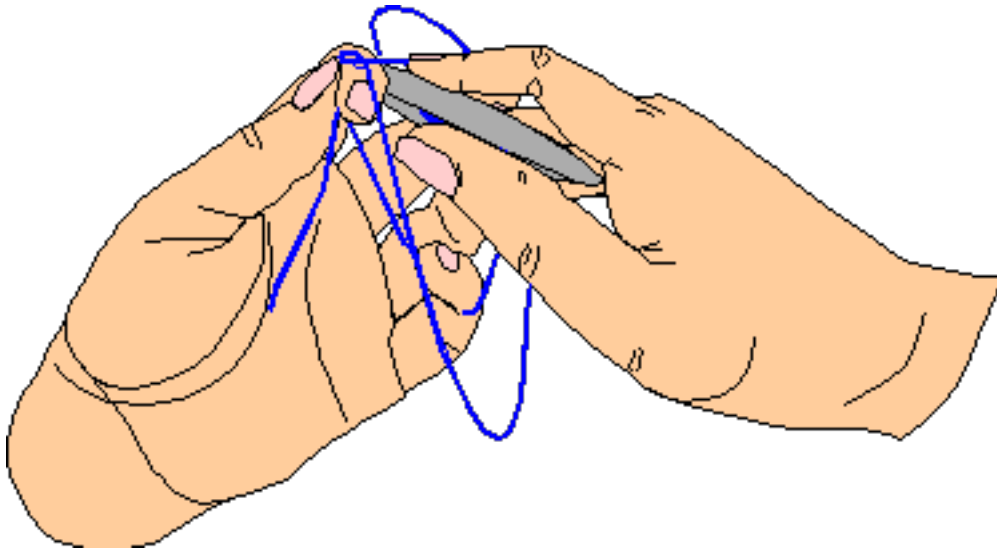

Do not drape the thread over the back of your right hand this time.

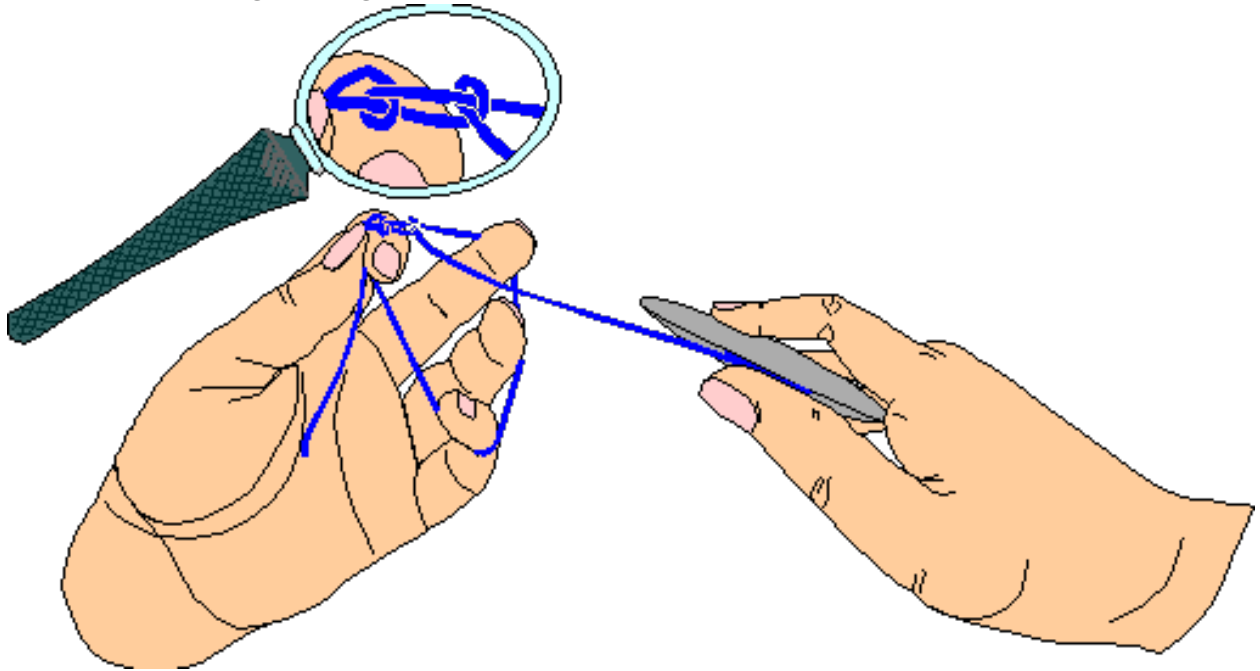

Pass the shuttle over and then under the thread between your left index and middle fingers.

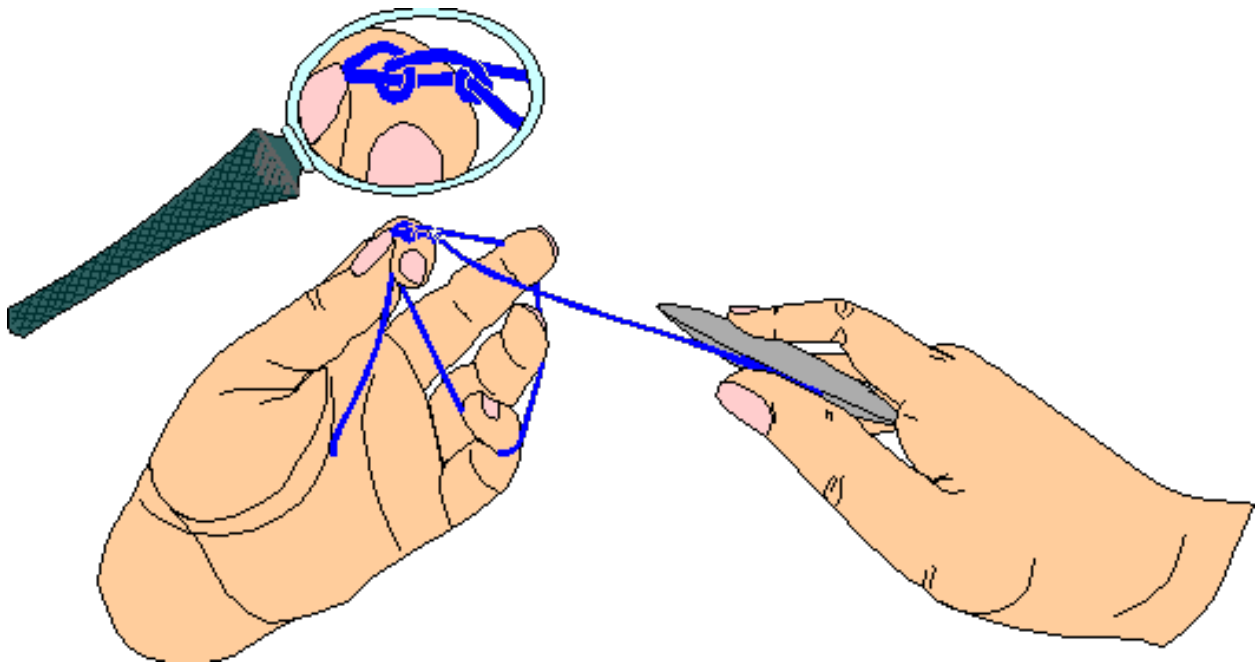

Pull the shuttle back through the loop that naturally falls in front of your left hand.

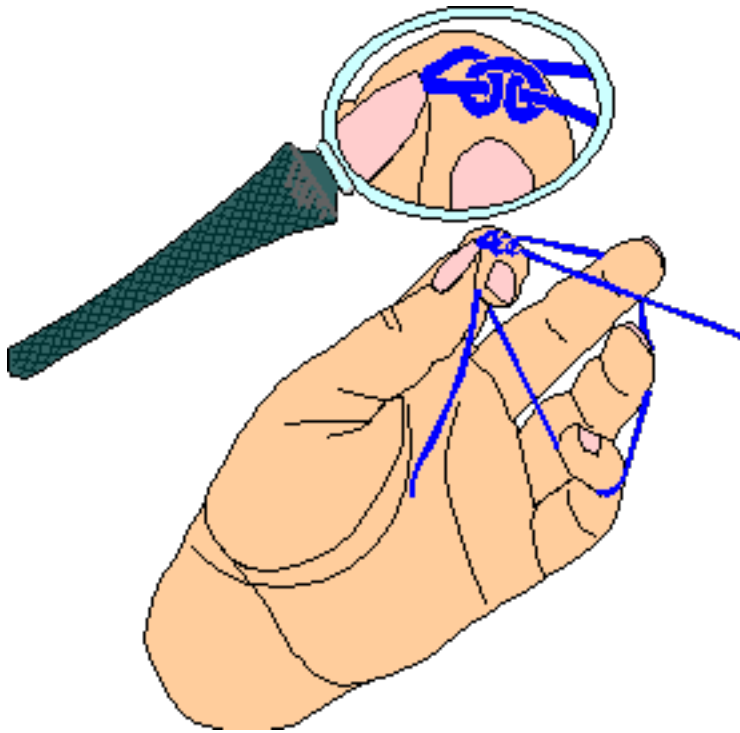

Pull the shuttle thread taut slowly while lessening the tension on your left middle finger to get the knot to transfer.

Like this:

You have now completed a basic tatting stitch

[Go on to picots.](#)

[Then closing a ring](#)
